A b o u t U s

NSR Maju Engineering and Supplies SDN BHD is a well-established and registered entity, proudly ***operating since its incorporation in 2003***. Founded by our current ***Managing Director, Mr. Shukhi Bin Haji Darus***, after his tenure with a manufacturing service factory in Kulim, Kedah, the company started with a small, dedicated team. In its early days, NSR Maju focused primarily on electrical services, offering low-voltage electrical projects such as wiring installation and repair. Mr. Shukhi's hands-on leadership and commitment to excellence were key drivers in the company's growth from the very beginning.

By 2006, NSR Maju experienced significant growth, both in terms of workforce and service capabilities. We began hiring skilled professionals with higher qualifications and technical expertise, which allowed us to diversify our offerings. As our team expanded, we ventured into the mechanical services sector, broadening our service portfolio and gaining attention from manufacturing companies in Seberang Perai and Kulim. The trust we built with these clients paved the way for further expansion, positioning NSR Maju as a reliable service provider capable of meeting the evolving demands of the industry.

As our reputation for delivering high-quality services continued to grow, we were entrusted with more complex and diverse projects. By 2010, several major companies sought our expertise in providing skilled manpower and specialized services, which led to the introduction of new service offerings such as competent labour provision, cleaning services, and landscaping. These additions reflected our versatility and our ability to adapt to the varied needs of our clients across multiple sectors.

Today, ***NSR Maju is a professional engineering solutions provider with more than 20 years of experience***, offering a wide range of services, including fabrication, installation, automation, maintenance, and industrial parts supply. With a strong workforce of over employees, our team is composed of specialized engineering professionals and technical management experts. Our growth and extensive experience enable us to confidently meet the diverse and demanding needs of our clients, delivering exceptional results with precision and reliability. At NSR Maju, we are proud to be a trusted partner in engineering services, committed to driving success for our customers with a focus on innovation, quality, and excellence.

Vision

To be ***recognized as the preferred engineering partner***, known for our commitment to quality, safety, and innovation in engineering services.

Mission

- To create value for our clients by delivering **cost- effective and high-performance engineering solutions.**
- Ensuring our customer satisfaction are guaranteed above their expectation.
- Providing high-quality construction and engineering services that ensure safety, sustainability, and efficiency across all projects.

Experience

Our company has been engaged in engineering **services-based business since 2002**. With **over 20 years in** industry, this long period of time is one of the examples that our company is an experienced company in facing any challenges in the arena of business and at the same time also experiencing growth in terms of company progress.

Professional

Employees are the main basis for moving a company. So here, we at NSR Maju have **our engineer and technician who are expertise in their respective fields**. These people come from educated backgrounds and are graduated from various institutes that are recognized by Malaysian government. Besides that, our professionalism and good ethics in handing customer inquiries by Identifying, evaluating and taking prompt actions on all projects and/or immediate or urgent call requisition.

Consultation

In line with our one stop engineering solution partner, we are fully committed in achieving highest level of customers satisfaction. This is by focusing all aspects of quality such as consultation smoothness, neatness of work and their endurance

Mechanical Engineering Services

Fabrication Off-site and On-site

We provide high-quality fabrication services, both on-site and off-site, with a focus on precision and reliability. Our skilled team works with a variety of materials, including **metal, plastic, stainless steel, and carbon steel**, to meet the specific needs of each client. We also have specific **Welding Procedure Specifications (WPS)** in place for fabrication, ensuring that all welding processes meet industry standards for quality and safety.

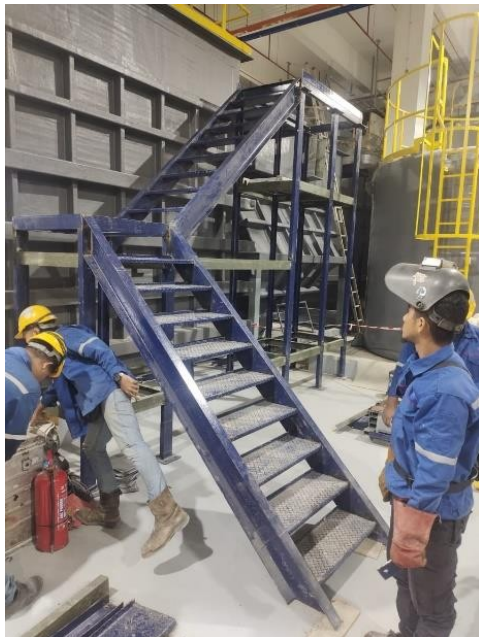

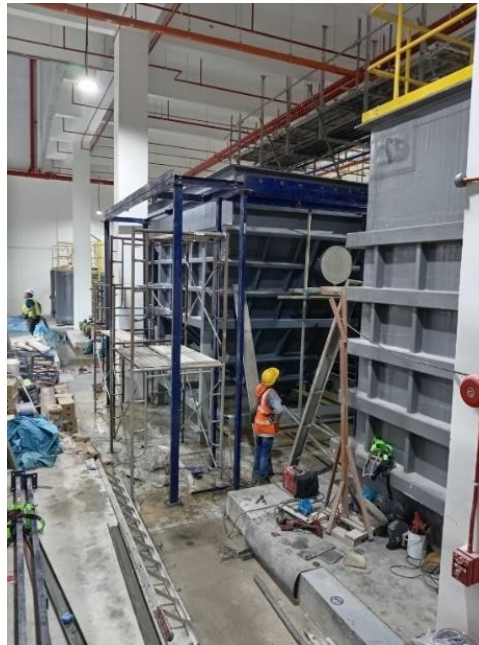

Our workshop in Bukit Berangan, Bukit Mertajam, is fully equipped for off-site fabrication, where we handle tasks like cutting, machining, and joining. We collaborate closely with clients from design to completion, offering customized solutions to ensure the highest standards of quality. For on-site fabrication, we deliver efficient and timely services to keep projects on track, ensuring smooth execution and successful outcomes.

Compressor Pump

We specialize in the installation, maintenance, troubleshooting, and repair of various compressor systems, including **Reciprocating, Rotary Screw, Centrifugal, and Diaphragm compressors**. Our experienced technicians ensure these systems operate efficiently and reliably for clients across different industries. We handle everything from installation and calibration to ongoing maintenance, making sure all equipment is set up correctly and working smoothly.

We also offer expert repairs, quickly diagnosing and fixing issues with advanced tools to minimize downtime. Regular maintenance checks help extend the life of the equipment by addressing wear on key parts like seals, bearings, and belts. At NSR Maju, we are committed to keeping your compressor systems running at their best, with minimal disruption to your operations.

Piping

NSR Maju is a trusted piping company that specializes in the installation, fabrication, and maintenance of piping systems. We work with **carbon steel** and **stainless-steel** pipes, handling a wide range of pipe schedules, **commonly from Schedule 10 to Schedule 80**. Our expertise covers industries such as oil and gas, chemical and water treatment, ensuring high-quality solutions for both small and large-scale projects.

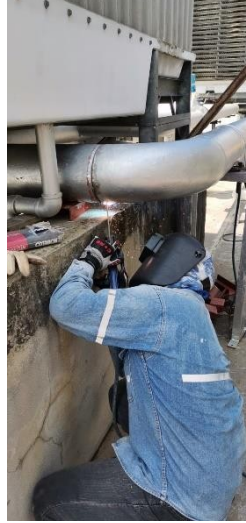

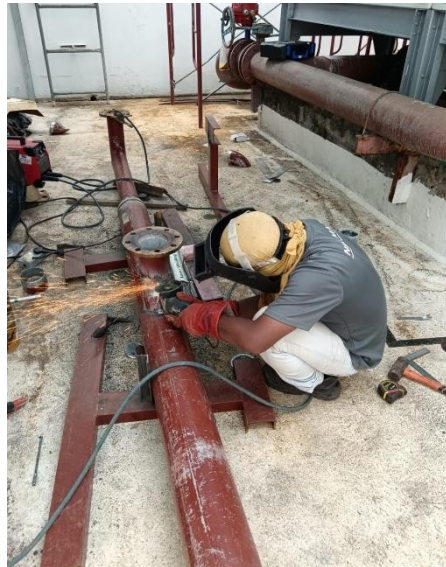

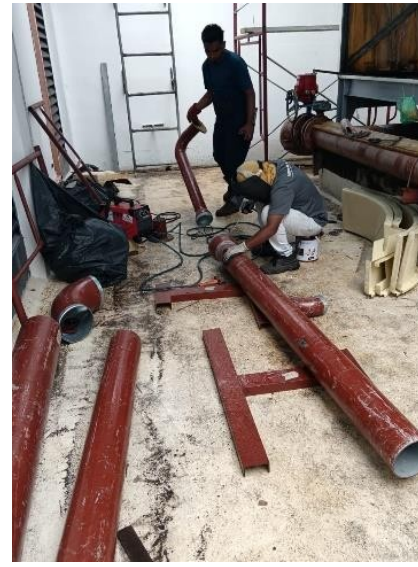

We offer a full range of services, including design and engineering, custom fabrication, installation, maintenance, and valve installation. Our team ensures that every project is completed to industry standards, whether it's for new installations or upgrading existing systems. We specialize in welding, pipe bending, precise fabrication, and the **installation of valves** to ensure reliable and efficient piping systems.

HVAC & Air Conditioning

One of our core specialties at NSR Maju is providing comprehensive air conditioning solutions tailored to the specific needs of each project. We offer a wide range of top-tier brands and models, carefully selected to match the size and specifications required for optimal performance in any environment. Prior to installation, our expert team conducts thorough analysis and calculations to determine the most suitable air conditioning system for the designated space, ensuring maximum efficiency and cost-effectiveness. This meticulous approach not only ensures significant energy savings but also guarantees that the system delivers superior performance while staying within our clients' budgetary constraints. In addition to expert installation, we offer dedicated air conditioning maintenance services that focus on essential aspects like cleanliness and system integrity. Our maintenance program prioritizes the cleaning of critical components such as air filters, blower fans, and cooling coils, ensuring they remain free from dust and debris. We also specialize in diagnosing and resolving issues like refrigerant leaks in cooling coils, which can significantly affect system efficiency and longevity. With our air conditioning services, clients can expect reliable performance, extended lifespan, and lower operating costs, backed by the expertise and professionalism of our team.

Civil Engineering Services

Our skilled civil engineering team specializes in providing complete infrastructure construction services. We handle every phase of a project, from planning and design to delivering fully functional infrastructure that meets our clients' specific needs. We focus on turning complex ideas into practical, sustainable, and cost-effective solutions that exceed expectations.

Our services cover a wide range of areas, including site preparation, structural design, earthworks, road construction, drainage systems, and utilities installation. We ensure every project is completed with precision and attention to detail, whether building new infrastructure or upgrading existing ones, ensuring all aspects work together seamlessly.

Provide Electronic Instruments.

Apart from carrying out engineering activities, we also serve as a supplier of hardware instruments and electrical and electronics components, which are used for installation, testing, and calibration purposes. Our company is registered with the Malaysian Ministry of Finance under specific codes, such as **020301** and **020302**, which authorize us to supply electronic and electrical accessories. We ensure that all these instruments and components are the latest, high-tech models to meet the diverse needs of current technology. Additionally, we have not forgotten about after-sales service, we offer a warranty period that suits each item to further enhance customer confidence.

Safety Provision

At NSR Maju, while we specialize in a wide range of engineering services, we prioritize the safety and security of our clients and their environments. Understanding the importance of creating safe spaces, we offer professional installation services for essential security systems, including advanced fire protection systems and CCTV surveillance systems. Our solutions are designed to provide peace of mind, ensuring that your premises are protected from potential risks and hazards. With our expertise in both engineering and safety, we help our clients maintain secure, compliant, and risk-free environments

Fire Protection System

We offer various types of Fire Protection System which we will ensure all this equipment are high-quality and safe to use. We also provide expert assistance in selecting Fire Protection System which best fits for the needs include with the main features of reliability and ease of use which can help our customers in preparing for all the possibilities that will happen.

CCTV Security System

We offer the best high-quality of CCTV security system in the market for our customer without burdening them with a high budget and above their price expectation. Our priority is to ensure that the CCTV security system can function properly throughout the usage and able to record clear moments so that it can be played back when needed time.
